***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance. Applicant's claims 1 –10, and 12 – 18 are allowable, because prior art does not teach an UBM layer formed directly on a passivation layer without a metal in between, and a solder bump formed on the UBM layer for preventing parasitic capacitance.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Remarks***

3. The examiner has reviewed prior art in light of applicant's comments and amendment and finds it persuasive as to the reading prior art. Prior art made of record and not relied upon, considered pertinent to applicant's disclosure include Lin (US Patent 6913946), Lee (US Patent 6551856), Baniecki et al. (US Patent 2004/0178436), and Tahara et al. (US Patent 6847066).
